

FrizonAgra SRL & FrizonAgra Crops SRL

Aggregated Financial Report
for the year ended December 31, 2017

Prepared by: JPA AUDIT TEAM, with the help of Teofil Dascălu & Anca Isac
December 31, 2017

FRIZON

Introduction

Dear Sirs,

This report is addressed to and intended for the information of the addressee, it is not to be referred to or quoted, in whole or in part, in any other context without our prior written consent. This report is based on the latest information. We emphasize that our presentation would not necessarily disclose all matters of significance to you relating to the Company.

This presentation is for the use of the Frizon Group and its shareholders and should not be distributed outside. We have taken all necessary steps in order to ensure that the presentation is free of misstatements.

Should you have questions or comments, do not hesitate to contact us.

Yours faithfully, JPA AUDIT TEAM,
with the help of Teofil Dascălu & Anca Isac

Return of equity (A/B)	n/a	n/a
Profit after taxes (A)	97	152
Equity (B)	-648	-479

All the statements in this report are based on the financial information produced by the Companies, according to Romanian Accounting Regulations and by discussions with the management, namely Mr. Teofil Dascălu. No attempt has been made to independently verify those statements and they are taken as they have been mentioned to us by the management.

The figures included in this report are based on the aggregations of the two companies financials. No steps have been taken to apply consolidation procedures, and, as such, no inter-company transactions or balances have been cancelled or eliminated.

Executive Summary

The shareholders of the Company are (in the order from the Statute): Mr. Dascălu Teofil - 16.25%, J. Houtsma Beheer B.V - 16.25%, Lettinga Landbow B.V - 22.5%, Fermasol B.V - 22.5% and TDS Finance B.V.- 22.5%.

The Farms operate the land leased from both individuals and legal entities. On December 31, 2017 both companies were operating 2,117 ha land (see other operating income for the structure).

During 2017 the Company received government and EU grants for agriculture, namely for the cultivated surfaces and for the fuel. Details are to be found in the Cost Structure section of the report.

The sales increased by 11%, due to the 70 ha area extension, mix of products. The production volumes stayed relatively stable.

Executive Summary

During 2017, 400 ha of crops were damaged by the weather. The production value was recovered from the insurance company (which contributed to the profit increase of 57% Y to Y).

Due to unusual unfavorable weather conditions, namely the heavy snow in April 2017, a large area cultivated with corn and sunflower had to be re-seeded. Thus, 98.62 ha of maize were re-seeded, for which 137 sacks of seeds and 550 liters of diesel were consumed, that worth an additionally 12,800 EUR. Also services from Frizonmaica were required to re-seed an area of 88.81 ha using the Versatile tractor and the Gaspardo Maximetro seeder, resulting a supplementary cost of 2,700 EUR. Regarding the sunflower crop, an area of 77.78 ha had to be re-seeded, for which 32 sacks of seeds and 560 liters of diesel were consumed, worth 7,200 EUR. In this case too, there was a need for services from Frizonmaica for re-seeding an area of 61.8 ha with the Versatile tractor and the Gaspardo Maximetro seeder. As result of this event, an additional 20,000 EUR was spent for the extra consumption, and for the provided services the sum of 6,800 EUR, which led to an increase in the cost of maize and sunflower crops and implicitly a decrease in profitability.

Financial Statements

STATEMENT OF FINANCIAL POSITION

The Companies have negative equity which is less than 1/2 share capital. According to the Romanian regulations, the associates should take action in order to re-establish the ratio between equity and share capital.

The group continued investing in new equipment and in modernising the existing equipment, hence the increase of 19% in the value of fixed assets.

The main finance line for the new equipment is the finance lease. Leasing liabilities increased as a consequence. The lease agreements are for the maximum of 5-7 years.

Working capital is negative, the resources to cover it being covered by the associates and suppliers' credit.

Payables remain stable. A reclassification separating trade payables from shareholders' loans has been operated in 2017 statements. The correspondent figure for 2016 is approx. 1.7 million EUR.

Receivables increase comes mainly from the intercompany financing by Frizonagra of Agricola Oostroem through trade sales.

Incomes from services comes from providing various services to the third parties, like fertilizing, subsoiling, cultivating, seeding, chemical treatments, harvesting, weighing, cereals analysis etc. Sales of services value increased in 2017 compared to 2016, by 543%, as a result of the acquisition and modernisation of new assets and equipment. Significant part of the service revenue comes from servicing other group companies.

Raw materials and consumables decreased by 8% as a result of a better management as a group, creating synergies and a higher bargaining power with suppliers. In the same context, emphasis was put on using active substances with greater efficiency vs. commercial products for crops.

Salaries remained stable as the team was not significantly changed.

Property, plant and equipment

Property, plant and equipment	EUR '000	
	2016	2017
Land and buildings	301	473
Equipment	2,050	2,537

Cumulated depreciation and depreciation level	EUR '000	
	2016	2017
Buildings	3	8
Equipment and Vehicles	276	356
TOTAL	279	364

Fixed assets value increase as a result of new acquisitions and upgrade of old equipment.

The efficiency of new equipment surpasses old equipment and cost of upgrading old equipment is sometimes significant.

The acquisition policy for new equipment should analyse the opportunity of using the lease facilities, as equipment is specialised and the market for is limited.

The Group would undertake an effort to analyse each production equipment efficiencies and come up with a restructuring of the production base for the attention of the owners (as per discussions).

At the end of 2017, the monthly depreciation of acquisitions during the year is 7,700 EUR, and the one related to acquisitions since the company's establishment is 21,400 EUR. Much of the 2017 depreciation refers to the investments in spare parts purchased for machinery repairs. The equipment acquisition value of 2017 is 729,350 EUR and the associated depreciation period is the maximum allowed by law for each acquisition category. The remaining depreciation value is 1,696,076 EUR. The total value of fixed assets recorded at the end of 2017 is 2,537,000 EUR.

Work in progress, which refers to the preparation of the next year productions and land, has a slight decrease, determined by a modified mix of crops and better use of fertilising substances.

Efforts are made by management to follow closely the consumptions and the quality and efficiency of substances used.

The table's 2016 "Field work in progress" shows figures which were not allocated to each crop, as it has been in 2017.

DELTA AGROPREST	10.4	3%	60
Others	59	17%	-
Total	357.40	100%	

Receivables have increased mainly due to sales to Agricola Oostroem (284 k EUR). Based on management discussions, the sales were made in order to support A. Oostroem as a start-up. The receivable shall be paid back as soon as A. Oostroem will be able to reimburse.

Recommendation: consolidation, as eliminating inter-company transactions gives a better view of the groups operations.

The receivables are in normal credit terms.

The Company has contracted short term lines of credit, mainly with ING and also has finance facilities through Agricovert.

Part of the short term financing, however, has been used, according to management, to purchase new equipment, which is long term. A better financial management should reallocate long term vs. short term resources to long term, short term respectively assets.

Trade and other payables in 2016 were not split between trade and shareholders payables. 2017 corrected this matter.

The cultivated area increased in the farming year 2017 by 117 ha, as a result of land acquisition through agency and lease.

Compared with the previous year, the sunflower price dropped slightly.

The production returns are similar to the previous period. The mix of crops is slightly modified, however, the price per/t has been different also.

Cost structure

Regarding the seeds, pesticides, fuel changes were noted, in the sense of increased expenses due to the increase of the production area.

The commercial discounts received for seeds, pesticides and fertilizers from the main suppliers, namely Alcedo and Agricovert, increased by 146 EUR'000, taking into account the larger ordered quantities, necessary for the efficient performance of the specific activities.

During the year 2016, the APIA subsidies for diesel and for the exploited areas were received. The amounts came from various types of specific subsidies, detailed in the table on the left, which are recorded in the accounting when they are approved according to the APIA statement, not when they are actually received in the bank account.

Salary costs remains stable, as the team remain basically the same.

The group has still a reserve of 300 ha of land, that can be subject for subsidy, as soon as it meets the necessary requirements.

The rent is increasing as a consequence of a market trend, driven especially by big companies, according to management. In 2017, more than 70 ha have been rented supplementary.

Insurance costs increased due to management policy of insuring the production against weather risks. As it has happen, during 2017, due to bad weather, 400 ha of production has been lost and covered fully by the insurance companies.

Interest expense for the group loans has been booked in 2017. Previous periods have been affected by the inconsistent interest expense booking.

Foreign currency loans are booked in Romanian lei at the rate exchange in force at year end. The volatility of the local currency affects the financials by negative or positive rate exchange differences. The Company did not book the rate exchange differences which have been born by the foreign currency group loans outstanding. This has affected the final result by understating the loss.

The rate exchange volatility will continue to affect the income statement in the future too. Management is willing to explore different solutions in order to minimize the financial effect over the financial statements.
